

A Practical Introduction to the NEC Term Service Contracts (TSC and TSSC).

Objectives :

At the end of the course, participants should appreciate :

- ❖ why the NEC was written
- ❖ its principal objectives
- ❖ how it is designed as a management tool
- ❖ the important clauses for operating an NEC Term Service Contract: definitions, procedures, timescales etc.
- ❖ differences between, including when to use, the full Term Service Contract (TSC) and the Term Service Short Contract (TSSC) and
- ❖ key implementation points & benefits.

As with all courses, this can be on NEC3 only, NEC3 with changes to 4th edition highlighted or purely on NEC4.

Programme :

- ❖ Session 1 : Overview of the NEC family in 30 minutes
- ❖ Session 2 : Flexibility & Contract Strategy : TSC or TSSC ? Main options, secondary options including use of option X19 Task Order.
- ❖ Session 3 : Key Players, contractual structure and communications
- ❖ Session 4 : Sections 1, 2, 4 & 5 : General, The *Contractor*'s main responsibilities, Quality Management, and Payment
- ❖ Session 5 : Change Management : planning / programming requirements, early warnings, & compensation events : definitions, process, timescales and assessment
- ❖ Session 6 : Use of Equipment, Plant and Materials, Liabilities & insurance, Termination & the Dispute options
- ❖ Session 7 : A quick run through the Contract Data
- ❖ Session 8 : Key Implementation Points & Benefits

This programme includes three syndicate work sessions.
